# Petifre: a Faker Maker

## *Background*

Petifre is a Faker Maker, a party that facilitates 419-fraud by providing technical capabilities to advance fee fraud syndicates. The document **“Faker Maker” A Study in 419 Facilitation** explains what a Faker Maker is at: <http://snapper.aa419.org/DS/projects/fakermaker/index.html>

The name Petifre was chosen based upon identifiers this party regularly leaves behind in FrontPage extension files on his spoofs, allowing us to track his activities. We can mostly link Petifre domains via domain registration data, even if it is bogus. While domain registration data belies discrete domain registration entries upon analysis, we can further link other identities based upon patterns and online web markers. These are explained and analysed later.

Petifre was identified upon observing numerous repeated Reserve Bank of India and Royal Bank of Scotland spoofs, also linked to American companies being spoofed. More businesses had their websites cloned and then their name and logo changed to represent a new fictitious company, while some websites represented totally fake business entities. Some UDRPs have followed. All of these are linked to Petifre.

The domain registrant patterns shows clear identifying invalid details. Numerous attempts were made with both Namesilo and Shinjiru to take action as allowed for under these circumstances, also with ICANN compliance. A facilitating factor is allowing clearly invalid address details into the domain name system. This was the topic of this document: <http://snapper.aa419.org/DS/projects/petifre/petifre.pdf>

The earliest sightings of this party go back to 2012 where he abused domains in job scam frauds and bank spoofs. Even while compiling this report, more traces of past domains were uncovered attributable to Petifre. Benefit can still be derived at this stage from recording these older domains as they allow us to see origins of registrant names chosen. Example: a Reserve Bank of India (RBI) spoof was registered with registrant name RBI Blessing, and then re-used again later for other domains. It shows the details in this report are part of a longstanding bigger abuse issue.

Currently this party is still continuing unfettered and the situation, both in terms of domain abuse and fraud, is totally out of hand. A party suspected for these spoofs and 419 websites has been identified. Not surprising is it is once again somebody advertising web design and hosting. This would most certainly fit in with the knowledge needed on how to abuse the hosting and domain name system, an IT industry insider.

## *History of UDRPs*

Domains attributable to this party have been involved in UDRPs for spoofing Statoil ASA, twice for spoofing the Société Générale S.A.’s brand and content and once for spoofing Actelion Pharmaceuticals, Ltd. No sooner did he lose control over the domain spoofing Société Générale S.A., than he registered a new domain to spoof them in further 419-fraud.

From the background:

Further, the **Respondent has provided fictitious contact information** in its registration details for the Domain Name based upon the failed attempt of the Center to deliver the Notification and the Complaint by courier to the Respondent's listed address.

and

*The Complainant alleges that the disputed Domain Name does not host an accessible website, and that email (MX) records have been configured for the Domain Name, suggesting **that the Domain Name may be configured for sending out unsolicited email offers.***

The same fictitious contact information is being massively abused. That email facilities were being abused had in fact been established by the anti-419 community. The domain was being abused to spoof Statoil in bogus job offers:

#### **UDRP related facts**

**Domain actelionpharmaceutical.com:** The same telephone number used for the registration, **+2348098708469**, is recorded 160 times spoofing other companies or used for totally fictitious companies, but with ever changing registration details, as seen in this report. Registrant email address [rbsind@yahoo.com](mailto:rbsind@yahoo.com), initially created to spoof the Royal Bank of Scotland (RBS) and the Bank of India (RBI), has been used 15 times and currently has three active domains spoofing RBI, two spoofing Citibank and a further two bogus couriers.

**Domain actelionpharmaceutical.com:** Email [rbsind@yahoo.com](mailto:rbsind@yahoo.com) is just discussed. Telephone number **+2348092659282** that was used for registration, has been used 153 times and is associated with 59 active domains and websites used as spoofs of banks such as Citibank, the Reserve Bank of India, Standard Chartered Bank, HSBC, Habib Bank etc, plus a span of other spoofs and bogus companies.

**Domain ssgciib.com:** Registrant email [pascaben@yahoo.com](mailto:pascaben@yahoo.com) which was used as registrant email was associated with the registrant name **AFIANDI BENSON** and telephone number **+2349084629018**. After the UDRP on 2014-05-15, [pascaben@yahoo.com](mailto:pascaben@yahoo.com) was used to register a Zurich spoof domain [zurichinvestmentbond.com](http://zurichinvestmentbond.com) on 2014/09/28, but now with a registrant name **PASCA BEN**, registrant company **Zurich** using telephone number **+2348092659282** – the same number as mentioned before for **actelionpharmaceutical.com**! As such we can assume a connection between these two UDRPs and registrants. Email [pascaben@yahoo.com](mailto:pascaben@yahoo.com) is associated with various spoofs of the Reserve Bank of India, bogus courier companies and even a spoof of the Ghana Bureau of Public Procurement (procurement fraud). Some of these domains are active.

**Domain cibsocietegenerale.com:** This domain was registered with email address [finbatrusts@yahoo.com](mailto:finbatrusts@yahoo.com) using registrant name FINBA TRUSTY and telephone number **+2347084086464**. This telephone number is associated with numerous identities. In fact, using a data driven approach, we can prove that this is the second time this party was involved in a UDRP for spoofing Société Générale as this was the exact same party as AFIANDI BENSON ([pascaben@yahoo.com](mailto:pascaben@yahoo.com)). More importantly, no sooner did this respondent lose the UDRP by not responding, than he registered a new spoof domain [societegenerale-cib.com](http://societegenerale-cib.com) currently active, using the registrant name **CHIZY SERINA** with email address [cp1\\_secure@yahoo.com](mailto:cp1_secure@yahoo.com) and telephone number **+2347084086464** – the exact same number as before!

Essentially this makes a mockery of any protections a brand owner has. No sooner has the brand owner successfully defended his brand after paying at least \$2,500 for the UDRP, than this malicious registrant simply obtains a new domain for a pittance and continues spoofing the same party. Meanwhile the relevant registrars have adopted a stance of “*we are only a registrar*”, while ignoring deliberately supplied

inaccurate WHOIS details, even blacklisting complainants if they lodge too many fake registration complaints abused as such.

Many identifiers were considered in this report, showing all four these UDRPs are linked to the exact same party and more importantly, banks and companies are continuously being spoofed on industrial scale by this party due to lacking registrar controls and checks not done as per the ICANN RAA 2013 WHOIS ACCURACY PROGRAM SPECIFICATION where the UPU postal format is available:

<http://www.upu.int/fileadmin/documentsFiles/activities/addressingUnit/ngaEn.pdf>

## Data Available Online

The data discussed in this report, was captured on the Artists Against 419 website at:

<https://friends:anti419pf@db.aa419.org/petifre/>

The data contains links to the Artists Against 419 main database where all relevant evidence was captured. While not publicly visible, with authentication, all snapshots can be viewed as well as values such as DNS SOA RNAME values etc. Any party wish to address this abuse is welcome to such authentication.

## Identifiers

Looking at non-whois and whois data based identifiers for this nefarious nest.

- Domains are registered with deliberately inaccurate registration details as also mentioned in the statoilgasuk.com UDRP. These show the state IMC in Nigeria, but such a state does not exist, nor is IMC a known abbreviation for any Nigerian state. This party also uses invalid five-digit postal codes whereas Nigeria has a six-digit postal code system.
- FrontPage extension files showing the name **Petifre** are constantly found, confirming whois data analysis links:

- The current choice of registrar is either Namesilo or llovetwww.com (Shinjiru), while there appears to be a preference for Shinjiru for new domains. This is most likely since Namesilo has recently suspended quite a few of this party's domains, yet most are left untouched. This would fit historic patterns where he did the same at other registrars and moved on when the registrars got wise to the games played, suspending his domains.

- Re-usage of telephone and email addresses: Email address are typically created per usage, and then re-used again repeatedly. Telephone numbers are also re-used. Namesilo's ...@privacyguardian.org and +13478717726 proxy identifiers are removed for now. They are encountered thirteen times.

We would expect more or less the same count of telephone numbers as email addresses. But this is not the case; we have 27 telephone numbers vs 65 email addresses. So obviously there is telephone number overlap. We also notice +2347084086464 vs +6007084086464 (used for the suspected reseller account reliablehostings.biz). We will investigate this shortly.

- Email versus telephone numbers: One of the numbers used is deliberately truncated to create a new unique telephone number; +23480926592 vs +234809265928 vs +2348092659282. The first two formats are invalid and the numbers do not exist. But not all and we see numerous distinct numbers and massive overlap of details of supposedly distinct registrants:

- This party is playing on the names Innocent and Ben and we see names, streets and emails continuously containing these; Inno Cent, Inno, Cent, City Ben, Benza , [pascaben@yahoo.com](mailto:pascaben@yahoo.com), afiandi benson, inno frank, inno road, innocent austine, ik inno, [innocentbenghalami@yahoo.com](mailto:innocentbenghalami@yahoo.com) etc.
- Content is normally hidden, with the bulk of the hidden content found at <http://domain-name/home/> although other paths have also been used like /uk, /in, /us etc.
- Many times the registrant name is based upon the domain name with first usage of a newly created email address, sometimes slight scrambled or with extra characters, and is found to be later reused again for other nefarious usage:
